- USE THEM ALSO
AFTER HUNT**

**TESTED BY
GERMAN KWF**

PINEWOOD® WILDBOAR PROTECT INNER PANTS

GOOD NEWS FOR ALL WILD BOAR HUNTERS! WE HAVE AN INNOVATIVE NEW PRODUCT IN THE FORM OF PROTECTIVE INNER PANTS FOR WILD BOAR HUNTING.

This is a pair of inner pants that can be worn under traditional hunting- or outdoor trousers. They are made of a light and soft material which makes them more flexible and pleasant to wear than traditional wild boar pants. The upper waist part consists of four-way stretch for extra comfort. The pants have double protective layers for cut proofness and puncture resistance. The compound of the material makes it extra protective against wild boar tusks. With these inner pants you'll be shielded against attacks while you easily can adapt the top layer depending on the activity. Thanks to these pants you will be secured even in case of an accident. To ensure function and safety for the user as well as oblige the legal requirements in Sweden and the EU, the trousers have been tested and certified by the German test institutes KWF and DPLF (Deutsche Prüf- und Zertifizierungsstelle für Land- und Forsttechnik) as an officially approved protective product for wild boar hunting or search.

“We received input that gave us an idea to use protective fabric that is used in protective gloves and for cutting meat. The thought grew and the idea of

making an inner pant that can be used under all types of hunting pants was born. We spent a lot of time on the design, because in addition to function, it is also important to have an appealing look that attracts the consumer. We had several discussions with various wild boar hunters and a close friend who was seriously attacked by a wild boar and bitten and cut open in the back of the thigh. That created the idea that the entire trouser should be protective, including the back. We started thinking about double layer protective fabric that is both puncture-resistant and cut-proof - innovative and better in terms of safety! After a year and a half of product development and testing, we are now launching the Pinewood® Wildboar Protect Inner Pants”.
